PROFILE

Data Scientist with Python coding skills and extensive financial industry experience

PROJECTS

Website: Created a data science projects website to showcase my work (<http://datasciY.com>).

Stack Overflow: Received 670 points for my answers on Python and Excel VBA. Helped new users with Python libraries.

TECHNICAL SKILLS

Machine Learning: regression, clustering, data mining, feature extraction, cross-validation, ensemble method, deep learning, principal component analysis (PCA), support vector machine (SVM), convolutional neural networks (CNN), stochastic gradient descent, Monte Carlo methods

Business Intelligence & Visualization: Excel, SQL, Tableau, Plotly

Software: Python (NumPy, Pandas, Matplotlib, Scikit-Learn, PyTorch, Keras, Jupyter), Linux bash, Github, Amazon AWS

QUANTITATIVE EXPERIENCE

Owner: 10 Sigma Risk LLC

2011-Present

- **Client, Crescat Capital LLC:** Provided derivatives trading and risk control services. Provided operational risk services and helped write a marketing brochure. Monitored portfolio risk using Bloomberg PORT application. (May 2014 – April 2016, Nov. – Dec. 2012)

Senior Manager: KPMG LLP

1997-2001

- Assisted a diversified energy company in calculating the correct risk on their spread trading portfolio. Used numerical approximation methods to custom fit a bimodal (two humps) probability density function to their energy trading data. As a result, Client was able to secure a \$5 billion debt.
- Wrote VBA code to calculate loss from excessive trading (from bid-ask spread and fees). As a result, Client was able to settle a \$128 million lawsuit for \$50 million.

Financial Analyst, Economist: SEC

1992-1996

- Calculated on behalf of the SEC, the potential risk on MBS (mortgage-backed securities) trading portfolios at large, U.S. banks. Received data files from each firm, wrote computer code to transform and clean the data, then conducted statistical analyses.
- Approved the risk controls on a \$20 billion Salomon Brothers portfolio because their hedge risk stayed within the company's risk tolerance.
- Spotted a \$500 million potential loss on Merrill Lynch's portfolio, which was beyond their risk tolerance. The company's Director of Risk Management disputed my calculations, but the company ended up reporting a loss of about \$500 million 6 months later.
- Made significant contributions to SEC's regulatory policy on MBS and other derivatives.

EDUCATION & CERTIFICATION

Global Association of Risk Professionals (GARP)

2011 FRM

Certified Financial Risk Manager

University of Chicago, Booth School of Business

1992 MBA

M.B.A., Finance and Statistics concentrations

Mount Holyoke College

1986 BA

B.A., Economics major, Physics and Music minors, *High Honors in Economics*
